Kali Systems Expands Role as Local Intuit Solution Provider

Honolulu, HI – July 17, 2009 – Kali Systems LLC®, long a partner to local businesses as an Intuit Retail Solution Provider and QuickBooks® ProAdvisor, is expanding its platform with certification as an Enterprise Suite Intuit Solution Provider.

In addition to providing expert local support for Intuit Point of Sale and QuickBooks Financial products for the small to medium sized businesses, Kali Systems now serves the more complex needs of evolving mid-size businesses with Enterprise Suite.

“We love having Kali Systems as our local Intuit Solution Provider (ISP)”, says BJ Schaknowski, director of Intuit Solution Provider program. “Kali Systems has a proven track record with excellent customer satisfaction. We are confident that Kali Systems will continue to provide quality solutions for customers in this broader market segment.”

As Intuit’s premier ISP for the state of Hawaii, Kali Systems delivers end to end services including initial business analysis, robust and secure network design, hardware and software sales and installation, migration, training and ongoing support.

“Enterprise Suite now brings the power and function of Intuit’s award winning business management products to the middle market” says Chris Picciotto, President of Kali Systems. “Kali Systems designs professional and reliable solutions to assure smooth operations for the long term. Applying the same drivers and best practices that large global companies use, we eliminate many of the problems experienced by do-it-yourself installations. Our commitment is to help local businesses succeed.”

Intuit business management products provide powerful tools for success, without the expensive price tag of similar products. Business owners realize improved productivity and reduced work load when duplicate points of data entry are eliminated. Vital company statistics such as purchase history, inventory control and overall performance metrics are readily available. Integrated sales and accounting records deliver more accurate year end financial reporting.

Building on a deep expertise and experience in IT outsourcing services and retail solutions, Enterprise Suite will offer additional scalability and room for growth to both first time users and to companies upgrading from QuickBooks Pro or QuickBooks Premier.

About Kali Systems LLC
